

Alternatives to Over The Counter Payment Collection

Coronavirus is causing unprecedented disruption to society with precautionary measures already affecting people's normal movements. Although we do not foresee major interruptions to the Post Office or PayPoint service, many customers who make payments "over the counter" will now be advised or reluctant to visit these outlets. We therefore wanted to remind you of alternative allpay payment collection options that could be used by your customers.

- **Internet payments** – your customers can make secure online payments at any time at www.allpayments.net using their Payment Reference Number (PRN) from their swipe card or barcode and their bank card
- **Telephone payments** – for those customers who do not like to make online payments, this simple automated telephone system takes your customers through every step of the payment process which fully meets PCI compliance requirements, again using their PRN
- **Mobile app** – available on both Apple and Android devices, this secure app can easily be set up with a bank card to make payments on a regular basis after a simple registration
- **Text payments** – even without a smartphone your customers can register and make payments after a brief registration online

As you and your customers are already using allpay for cash payments, any of these solutions can be implemented within 48 hours with no set-up cost. Also, if you need a list of your customers' PRNs, we can easily provide this for you.

For more details please visit www.allpay.net/our-solutions/credit-debit-cards. If you want to start providing one of these solutions to your customers quickly please contact clientrelationshipmanagers@allpay.net.

Thank you,
